

NEC Managed Services

Cyber Shield

Your Shield Against Evolving Threats.

\ Orchestrating a brighter world

Managed Security Operations Centre (SOC)

Building a Secure Business Fortress

NEC's Advanced Response Centre (ARC) uses cutting-edge security monitoring to protect your entire network and endpoints. Our certified SOC and penetration testing, recognized by CSA Singapore, detect and prevent complex cyberattacks before they happen.

Protect your organization with NEC's comprehensive security solutions.

NEC As A Dedicated Centre

As companies rely more on digital technology, cyber threats grow — especially with limited employee cybersecurity awareness. Are your IT professionals equipped with the skills and tools to detect, prevent, and respond to security incidents before they escalate?

Service Offerings

Consultancy

Security Monitoring / Managed Defence

Threat Detection and Response

Our ARC provides 24/7 monitoring and threat protection, enabling fast incident response and reducing downtime — all without the cost and complexity of an in-house SOC.

2. SOC Monitoring/ Managed & Defence

Case Study

The customer organizes trade events, uniting industry leaders to share ideas and shape key decisions.

Why They Engage With NEC

Customers choose NEC for cybersecurity services to meet governance requirements and protect IT infrastructure. We assist in implementing security practices, establishing incident response and business continuity policies, and providing oversight and accountability. Our approach includes resource allocation, risk management, and shaping a resilient cybersecurity posture to safeguard your organization against evolving threats.

NEC's Solution

NEC provides modern cybersecurity services with proactive management and real-time monitoring. We use advanced technology to collect, analyze, and correlate security events across cloud and onpremises systems.

NEC's 24/7 Advanced Response Centre (ARC) ensures continuous monitoring, rapid threat detection, and proactive incident response. Our expert SOC analysts meticulously analyze security data, swiftly identifying and mitigating threats based on a structured incident response plan. The ARC also manages infrastructure, applies updates, and performs maintenance to ensure peak performance and security resilience.

Why Choose NEC Managed Services?

NEC Managed Services serves as a regional hub with best practices and market demand competency, specializing in advanced IT managed services for healthcare, the public sector, and commercial businesses.

NEC is a member of the Cyber Threat Alliance and Japan's Cybersecurity Strategic Headquarters. We support INTERPOL with cybercrime investigations and training for investigators and forensic experts.
